

ID Mail Systems, Inc.

Dispatcher Max

Dispatcher Max

The "All Sort" for Mail

Who it helps:

- Postal Operators
- Presort Bureaus and Mail Service Businesses
- Private Delivery Companies
- Commingle of 3 dimensional mail

What it does:

- Sorts mail pieces from a small postcard to boxes up to 15.74" x 11.81" x 1.57" (400mm x 300mm x 40mm)
- Sorts 10,000 letters per hour or 7,000 large flats & parcels per hour
- Sorts mail pieces up to 6lbs (3Kg)

Why it's different:

- Processes "rest mail", which means all mail
- Range and flexibility of mail piece types & sizes
- Labels, prints and sorts mail pieces in one pass
- Printing a postal barcode or routing code on rest mail

Mail Types:

- Letters
- Flats
- Ecommerce packets
- Magazines
- Newspapers
- Small postal parcels & boxes
- Catalogs

Features:

- 2-6 station manual input module
- 13" (330mm) field of view color camera
- Labeler/Printer combination module
- Optional precision inline weighing scale
- Configurable image processing delay module
- Configurable sort modules from 3 outputs to 150 outputs
- Dynamic bin allocation
- 180° U-Turn for constrained space

Created for sorting "rest mail" in a high volume postal environment, the Dispatcher Max is designed for extreme flexibility and variety. The Dispatcher Max can sort everything from small postcards and normal letters to oversized flats, packets, newspapers, magazines and even small packages. The modular design allows customers to configure the system to their exact needs. The Dispatcher Max – "*dispatching the notion of non-machinable mail.*"
