- OCR of addresses
- Assigns delivery point barcodes or mail route codes
- Postage payment via USPS Itemized Manifesting
- Reduces postage
- Processes up to 700 pieces an hour per station
- Networking capabilities (up to 8 stations)

How it's different from other workstations:

- Lowest price OCR system on the market
- Processes the most USPS worksharing classes for mail reporting
- Itemized manifesting solution

Features:

- OCR color camera
- Handheld imaging scanner
- Built in weighing scale
- Touchscreen monitor
- Label/printer for IMb, IMpb, and Indicia
- Ergonomic workstation
- Optional Auto Dimensioning

USPS Mail Classes:

- First Class Flats and Packages
- Priority Mail and Cubic Priority Mail
- Marketing Flats and Parcels
- Bound Printed Matter
- Library Mail
- Media Mail
- Parcel Select
- Parcel Select Lightweight

The Max-M is an OCR mail processing workstation for postage savings based on worksharing discounts. It allows mailers to process small volume batches of flats, packets and parcels into commingled mailings at the lowest postage expense. It is easily configured for a single station or network group stations and for different mail coding requirements.
